20” MANWAY NH/LP TANK CAR

TRAINING DOME

The ammonia / flammables 20” tank car training dome part# DOME-NH/LP is a mobile training device for simulating leaks for the hands-on training with the Indian Springs ERK and other rail car capping devices.

The valve manifold allows the instructor to simulate a leak, with water or compressed air, in either of the 2” Product Valves or through the pressure relief device. Unit comes with a lid and pin. Heavy duty casters allow for safe and easy handling.
