

## LEVEL "A" & "B"

# PROTECTIVE CLOTHING

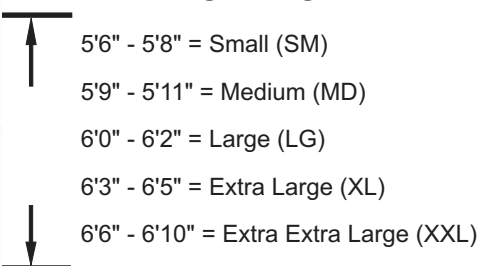

The Responder is a light weight level "A" total encapsulating suit designed and priced to be a limited use garment. The suit is durable enough to withstand several uses, while also being economical enough to discard when contaminated or when the suit shows signs of wear.

Manufactured from a tough substrate and composite material with sewn and heat sealed seams, Responder provides excellent protection to a wide variety of hazards including chlorine, sulfur dioxide and ammonia.

**Features include:**

- 40 mil. polished pvc window
- Two covered exhalation valves
- Sock boots and splash guards
- Tapered shape and roomy sleeves
- Internal belt and attached butyl gloves.
