

KIT-C ACCESSORIES

The Chlorine Institute Emergency KIT-C includes the tools and devices to contain most leaks on standard chlorine tank cars and tank trucks. However, additional equipment may be useful/required for its proper application under certain circumstances. The KIT-C Accessories are items that may be of assistance that are not currently included in the Chlorine Institute kit.

CG400

Pressure Gauge

Easily monitor tank car pressure with the KIT-C tank car pressure gauge. Assembly attaches to the tank car angle valve outlet and extends out beyond the tank car housing. Large 5" dial for easy reading.

CAK15

Accessory Kit

- Swabs and Wash Bottle to identify leaks
- Hex Wrench and Plug for angle valve outlets
- Wire Cutters for outlet plug tethers
- Pipe Wrench, Wire Brush and Rags for application prep

NGSET

Enhanced Fittings Tool Kit

Adapter set for the railcars with Enhanced Fittings. Tool set removes the outlet faceplate on the next generation valves which is required for the application of KIT-C

Note: the devices listed above do not constitute a complete list of items which may be needed in an emergency.
